## THANK YOU!

To our sponsors, speakers, volunteers, and attendees, thank you for making BSides 2023 a resounding success.

Want to help in the meantime? The Illinois Cyber Foundation operates all year long.

## BSides Peoria?

Central Illinois has not had a proper security conference in a number of years. Using the framework BSides has put together, we're making that happen in the heart of Central Illinois. BSides Peoria is operated by the Illinois Cyber Foundation.

## Where did BSides come from?

BSides is a community-driven framework for organizing and holding information security conferences, a concept that began in the US in 2009. Because the call for papers that year for Black Hat Vegas was oversubscribed, a number of quality speakers were rejected—not because of lack of quality but of lack of space and time. Those unable to present decided to hold their own conference on the “b side.”

Since then, many BSides events have been arranged in several countries throughout the world. BSides has come to be known as a conference by the community for the community. Events are generally inexpensive to attend and rely heavily on sponsorship to pay for the venue and other costs.

Because BSides events offer smaller, more intimate networking atmospheres and breakout discussions, they foster strong audience participation and overall group interaction. They create opportunities for individuals to both present and participate in an atmosphere that encourages collaboration.
